

<b>Product description</b>	Suspension of ultra-fine mineral particles that are perfectly incorporated in aqueous media and increases the pH, giving this quality a permanent natural preservative power against bacteria (making use in the formulas of any CIT, MIT and BIT unnecessary).
<b>Application area</b>	Ideal for manufacturing water-based paints acting as a natural preservative.

**Characteristics and technical properties**

Breathable, porous and permeable material.

Specific weight	1,2 ± 0.05 g/cm <sup>3</sup>
pH	12 ± 1
Viscosity	< 850 cP
Appearance	Semi-liquid
Colour	White

**Incorporation**

It is incorporated at the beginning of the formula so that a pH shock does not occur. The recommended dose is 0.2–0.5% over the final formula by weight.

**Storage**

Keep in its original containers, closed and in a dry and cool place. Preserve from frost and avoid direct sun exposure. Unopened, it is preserved for at least 12 months. The product can thicken, without losing properties; shake well before use.

**Observations**

We advise the use of gloves and goggles during handling.

**Formats**
